CONTENTS

Vol. 27, No. 1 (2005)

D. C. Joshi and H. D. Doctor	Numerical Solution of Boundary Layer Equation Through Quintic B-Spline Collocation	1
I. H. Nagaraja Rao and R. V. Ramana	Some Relations involving the Orders and Types of Two or More Entire Dirichlet Series	17
S. S. Tak and G. S. Sisodia	Viscous Heating in Initial MHD Free Convection Flow along Uniformly Moving Vertical Plate	25
S. P. Yadav	On Some Asymptotic Orders of Jacobi Polynomials	33
Saeid Shams and S. R. Kulkarni	On a Certain Subclass of Univalent Functions Defined by Ruscheweyh Derivative and Subordination (I)	39
P. S. Kantawala	On Strong Nörlund Summability of Orthonormal Series	53
B. C. Tripathy	On Normal Sequence Spaces and Domain of Matrix Maps	63
C. Sulochana D. R. V. Prasada Rao and D. V. Krishna	Finite Element Analysis of Convective Heat and Mass Transfer through a Porous Medium in a Horizontal Channel	69
Pon.Sundaram	Classification of Non-oscillatory Solutions of Neutral Difference Equation	95
L. Khalsa, J. K. Jumale and K. D. Thengane	Solutions of Field Equations $R_{ij} = 0$ for $[\frac{1}{\sqrt{2}}(y + z) - t]$ -type and $[t\sqrt{2}/(y + z)]$ -Type Waves in Six Dimensional Space-time	109
G. S. Khadekar and Vrishali Patki	De-sitter Type of Cosmological Model in N-dimensional Space-time-Mass Theory of Gravitation	123
V. S. Gogulwar and K. C. Deshmukh	Thermal Stresses in a Thin Circular Plate with Heat Sources	129
Mamta Rani and Vinod Kumar	A New Experiment with the Logistic Function	143
P. K. Banerji, Deshna Loonker & S. K. Al-Omari	Multipliers of a Distributional Hankel-type and Schwartz-Hankel Integral Transformations	157
R. K. Saxena, J. Ram and S. Chandak	On Two-dimensional Generalized Saigo Fractional Calculus associated with Two-dimensional Generalized H-transforms	167
R. Suresh Kumar and G. Gopal	A Stochastic Model for the Expected Time to Recruitment in a Two Grade Hierarchy Manpower System	181
S. Sundar	A Recursive Packed Algorithm for Cholesky Factorization of Tridiagonal and Pentadiagonal Matrix	193
T. N. Shanmugam & A. Gangadharan	On A Class of Univalent Functions	201
Book Review	Basic Linear Algebra (2^{nd} Edn.) by T. S. BLYTH AND E. F. ROBERTSON, Springer (SUMS)	213

CONTENTS

Vol. 27, No. 2 (2005)

Santosh Kumar and M. Imdad	A General Common Fixed Point Theorem Without Continuity	215
Darshana A. Mehta & Devbhadra V. Shah	*p*-th Order (*a, d*)-Cut-off Numbers	231
Virgil Pescar	On the Univalence of Some Integral Operators	239
M. S. N. Murty and B. V. Appa Rao	On Three-point Boundary Value Problems for Quasi-linear Systems	245
B. B. Waphare	Applications of Vector Differential Operator ∇	253
K. W. Khobragade & N. W. Khobragade	An Inverse Steady-state Thermoelastic Problem of a finite Length Hollow Cylinder-II	261
Yogesh Sharma	Generalized Stieltjes Transform of Matrix Variable	289
Ragabia H. Sallam, Adel N. Adeb and Ahmed H. Manna	On Quasi-frobenius Rings a Strongly Right Johns Which is Quasi-Frobenius	295
D. Bharathi and A. Prasad	Magnetic Groups and Their Corepresentations of the Point Group 8 2m	299
G. S. Khadekar and Shilpa Samdurkar	Cosmological Models with Variable Cosmological Term in Kaluza-klein Theory of Gravitation	307
Sanjib Kumar Datta	A Note on the Order and Type of a Meromorphic Function	317
Kalpana and Gajendra Singh	CR-Submanifolds of a Special Quadratic Kahler Manifold-I	329
P. R. Sharma and Seema Chawla	Effect of Slip Velocity on Mhd Flow through Inclined Channel : Upper Wall Is Moving with Constant Velocity and Lower Wall is Lying on the Surface of Two Porous Media of Different Permeabilities	339
V. K. Bhat	Orders in Artinian Rings	349
S. S. Thakur and R. K. Khare	Fuzzy Regular Generalized Continuous Mappings	355
Munmun Hazarika	Unitary Equivalence and Reducibility of Unilateral Operator Weighted Shifts	361
M. Sundaram, R. Ponraj and S. Somasundram	Prime Cordial Labeling of Graphs	373
T. Linga Raju and P. S. R. Murty	Quasi-steady State Solutions of Unsteady Ionized Hydromagnetic Flow Between two Parallel Porous Walls in a Rotating System	391
Mohammad S. Sarsak	Quasi Continuous Functions	407
R. Narayanan	Infinite Family of Generalized Fibonacci Polynomials	415
R. Devi, K. Muthukumaraswamy and V. Kokilavani	$g^{\#}\rho$-Closed Sets, Where $\rho \in \{\alpha^{*}, \alpha^{**}\}$	421
S. Sundar	A Numerical Case Study on Nonlinear Methods Induced By Linear Krylov Solvers	431
S. P. Goyal and Ritu Goyal	On a Class of Multivalent Functions Defined by Generalized Ruscheweyh Derivatives Involving a General Fractional Derivative Operator	439
Antonio Carbone	Maximal Elements and Equilibria Applications	457
Book Review	Probability Models by John Haigh, Springer Verlag, London Ltd.; (Springer Undergraduate Mathematics Series (SUMS)	465
